Readmaster: "A.C.E.'s Premier Reading Enhancement Program"

Plus: Math Builder, Word Builder, and Typemaster

Give your students a reason to be excited!

- Increase reading speed!
- Improve comprehension!
- Develop vocabulary!
- Learn keyboarding!
- Enhance math skills!

Readmaster Plus

Includes Readmaster, Typemaster, Math Builder, and Word Builder

Excitement is generated when students actively participate in their education through computer-based learning.

Readmaster Plus is an individualized educational software suite that enhances students' educational experiences in reading, word power, typing, and math skills—four very powerful, educational, computer-based programs. Students are diagnosed and progress through various skill levels. Use of Readmaster Plus assists schools in obtaining model/quality status. This status enables schools to dual enroll students with Lighthouse Christian Academy to obtain accredited diplomas and transcripts.

You will be able to:

- ✓ track the student's progress on a daily or weekly basis.
- ✓ personalize programs to meet individual student needs.
- ✓ print certificates of merit as the student progresses.

The user-friendly interface simplifies navigation for students and supervisors.

Readmaster®

Increase comprehension as timed reading exercises and questions help build speed and accuracy.

Students in Grade Levels 1 through 12 can improve their reading rates and comprehension skills with A.C.E.'s computerized reading program.

Readmaster features computerized diagnostic testing and scoring, vocabulary drill, and 36 quality reading selections from the recognized Christian Character Series at each grade level.

The student's reading rate is controlled, and vocabulary drill and comprehension testing are part of each lesson. Students are challenged to read better, faster, and with confidence.

Typemaster®

Learn proper keyboarding positions, speed, accuracy, spelling, word usage in sentences, and character.

Help your students develop good keyboarding skills by introducing them to Typemaster. Designed for Grade Levels 1 through 6, it provides drill and practice activities along with reinforcement of many character principles.

Typemaster is a touch-typing program comprised of six sections, each containing twelve complete tutorial lessons with new concept drills, review of previous material, and a timed test.

For the student who already knows how to read, this program will provide a tremendous head start in keyboarding and computer familiarity.

Math Builder®

Choose the concept and level to practice basic addition, subtraction, multiplication, division, fractions, decimals, time, and money.

Use A.C.E.'s Math Builder to enhance your students' abilities to use math facts and master all the basic math skills commonly learned in Grade Levels 1 through 6.

This program of electronic flash cards, drill and practice, and educational math games is fun and exciting for the student. The drills cover elementary through advanced math concepts.

Addition, subtraction, multiplication, and division have never been so much fun!

Word Builder

Make spelling fun with computerized help to build vocabulary and accuracy.

To give your students additional help and drill in word usage, pronunciation, and spelling, use A.C.E.'s Word Builder.

Word Builder can help a student improve his vocabulary skills as he evaluates proper spellings and meanings. Common misspellings are also covered.

The program features a variety of drill and practice along with emphasis on spelling, word meaning, and word usage.
